

# Fast Install Steps

## Install Steps

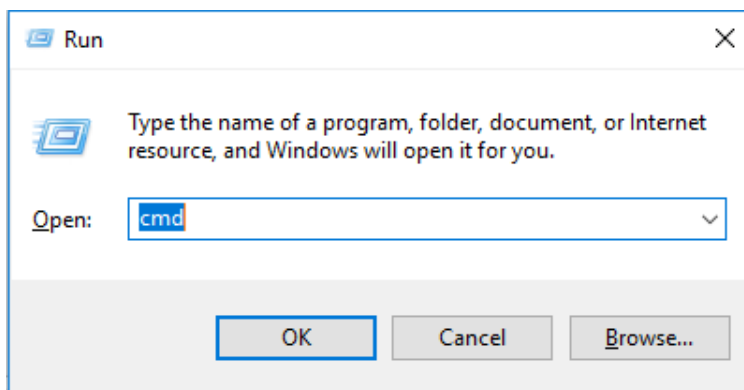

- 1) Go to the user's Workstation that will run the upload/download communications.
- 2) Download **setup.exe** from MASTERCOM's web site and save it in your **\Downloads** folder so you can unblock it. To unblock, right-click it and on the General Tab click the **Unblock** and **Apply** buttons. This should help in avoiding "Open File – Security Warnings when programs are executed.

- 3) Move **setup.exe** from your **\Downloads** folder to the Power Broker mapped drive where the folder **\BRO** resides, as illustrated below. In this case the mapped drive is R.

- 3) Go to the command prompt by holding the Windows Key down and type "R" and in the "Run" dialog box, as shown below, type "**cmd**" and click the **OK** button.

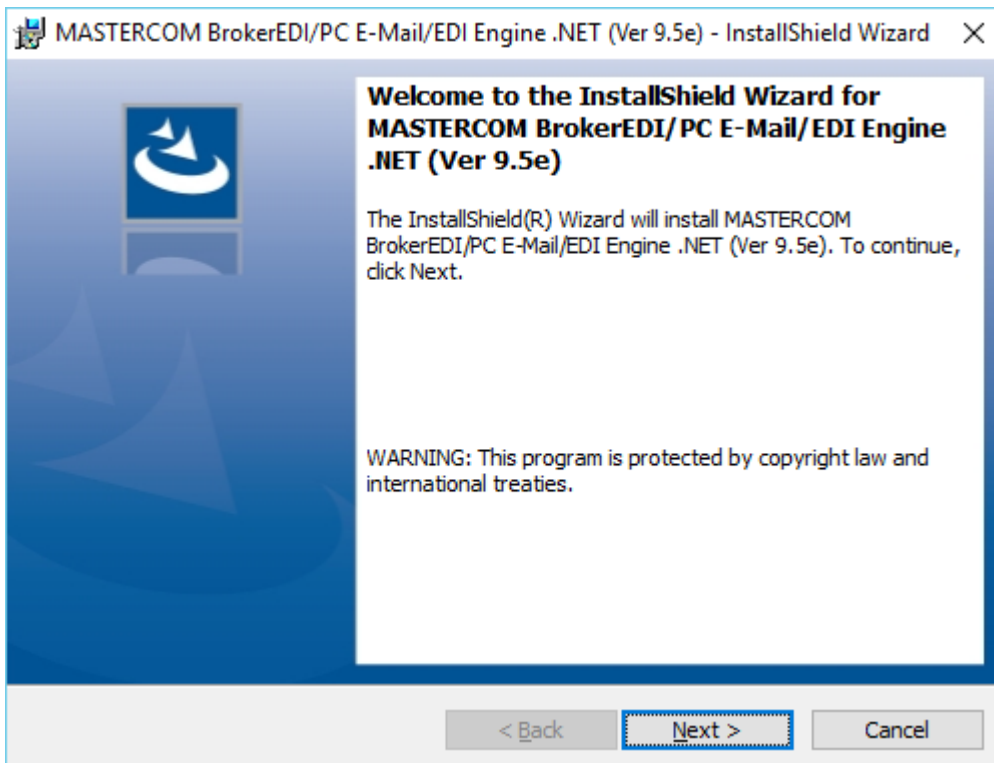

- 4) At the command prompt, type your mapped drive letter, colon and press the <Enter> key e.g. **R:<Enter>**, as shown below, to switch to the R: drive.
